Dear Mr. Wedlake:

Re: Colbert Landfill/Proposed Treatment of Landfill Condensate

We are reviewing the material provided to us in Ms. Deb Geiger's letter of April 3, 1997. This material fulfills all data and information requirements, except one, listed in my March 17, 1997 letter to you. We still need the approval of the Spokane County Air Pollution Control Authority.

The analysis results of the current condensate do not give us cause for concern, but we note the sample and condensate was collected during a period of record precipitation. We would expect the condensate from a normal period of precipitation or dry period to be different. As we can not reasonably estimate those differences, we would require a sampling program to accompany an approved plan for condensate treatment.

If you have any questions regarding this letter please contact me at (360) 407-7239.

Sincerely,

Michael Kuntz
